- *Hotels/Motels*

## **USE FOR**

- *Rust*
- *Calcium*
- *Lime*
- *Mold*
- *Mildew*
- *Scale*
- *Soap Scum*

## **DIRECTIONS FOR USE**

To clean and descale both toilet bowls and urinals - First, remove standing water by forcing it up and over the trap area with a swab mop. Saturate swab mop with bowl cleaner. Start the cleaning operation under the rim of the commode or top rim of the urinal using the side of the applicator. Force the bowl cleanser up and into the water outlet holes allowing the product to run down the sides of the bowl or urinal. This will allow full strength product to come into direct contact with the area most likely to have the worst build-up of organic soils. Allow this product to remain for at least 10 minutes until all rust, scale, and deposits are loosened. Rinse by flushing. For heavily soiled areas, a preliminary cleaning is required.
